CONSTRUCTION

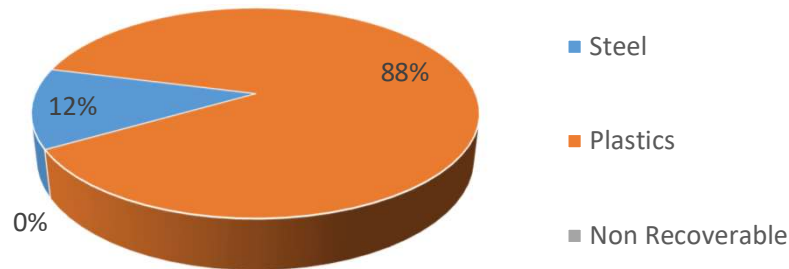

The cushioned seat assembly consists of seat base moulded in glass filled poly-amide, moulded polyurethane foam & upholstered with high stretch knitted polyester fabric. The seat & back are firmly connected to the base frame & are cantilevered in such a way that it gives multi-dimensional movement possibility just with simple lean. The 'S' shaped spines moulded in high strength glass filled polyamide & the spine connector moulded in glass filled polyamide form the back structure.

DESIGNED FOR DURABILITY

Designed for longer life & its knocked down construction provides extended life by easy part replacement and serviceability.

OVERALL MATERIAL CONTENT

Overall material content excluding the weight of packaging material is as shown:

RECYCLED MATERIAL

We use and promote recycled material in the products as well as in its packaging.
